

The Seismological Society of Japan was established on March 11th 1880

Jiro Tomari^{1*}

¹ERI

According to usual histories of seismology, the Seismological Society of Japan was established on April 26th 1880. But I found some articles writing clearly that the society was established on March 11th 1880. These articles appear in Transactions of the Seismological Society of Japan, Vol.6, p.40 , The Japan Gazette of March 12th 1880 and so on.

Keywords: The Seismological Society of Japan, histories of seismology
