The SGEPSS future survey working group was established in May 2012 with the goal of surveying and summarising the current status and future vision of the geomagnetism and earth, planetary and space sciences. The working group released the document that summarises the current status and future vision on the webpage of SGEPSS in January 2013 and booklets are ready to be distributed. In this presentation, we outline the chapter for instrumentation, computer simulation/modelling, and data system/handling.
