Radiocarbon dating using new AMS system

Yosuke Miyairi^{1*}, Yusuke Yokoyama¹

¹AORI Univ.Tokyo

The Accelerator Mass Spectrometry(AMS) is effective in radiocarbon dating. By the conventional method, a large tandem accelerator(e.g.Accelerating voltage = 5MV) was used. The small accelerator(e.g.Accelerating voltage = 500kV) is used in the

The small AMS machine is handy. We installed small AMS machine in our laboratory. We will present the outline of new AMS system and the application research using that.

Keywords: AMS, Radiocarbon, Accelerator Mass Spectrometry, 14C
