

From who, where, how many and what to 'Earth science'

KENJI, Kato^{1*}

¹Department of Geosciences, Graduate School of Science, Shizuoka University

Glancing at 50 years' history of aquatic microbial ecology since Wright and Hobbie proposed an uptake kinetics using radio-labeled glucose, I may pose issue(s) of consideration for microbial ecology as an earth science.

Keywords: ¹⁴C-glucose uptake vs. ³H-Thymidine uptake, Production vs. Respiration, sec vs. year
