A map drilling of volcanic disaster prevention by voluntary groups: An Example at Nasu volcanic area was held in the area of Nasu active volcano. This evacuation drilling at Nasu municipal government for voluntary groups of town people was supported by National Association for Disaster Prevention, Promotion Council of District Continuity Management, and Disaster Prevention Qualified Counselor in Tochigi. This project was managed financially to perform for last two fiscal years between 2012 and 2013. As a result, present drilling was very effective, especially for community people living near active Nasu volcano, in order to learn evacuation managements at the future volcanic emergency.
