Development and publishing of the Seamless Geological Map of Japan (Chiriinchizu edition, tentative name)

NISHIOKA, Yoshiharu\textsuperscript{1} ; NAGATSU, Juri\textsuperscript{1} ; KITAO, Kaoru\textsuperscript{2}

\textsuperscript{1}Institute of Geology and Geoinformation, AIST, \textsuperscript{2}CubeWorks Inc.

We developed a next viewer of the Seamless Geological Map of Japan 1:200,000 with rewriting a cord completely. This viewer adopts the Chiriinchizu as a base map. This viewer, and also, the most high technique everywhere, for example 'Portable map', it’s applied. We are going to publish this viewer in May of this year.

Keywords: Seamless Geological Map, Leaflet.js, Chriin tile, portable map, Web site
