The society where everyone can challenge diverse carriers

*Shigeko Togashi¹

1.National Institute of Science and Technology

I'd like to aim at the society where everyone can challenge diverse carriers according to the respective individuality. Actually, however, many barriers exist relating to the gender, the nationality, the disability and the generation. We have to behave to change the social mechanism and individual awareness. I'd like to look back to the past action of JpGU and consider the future.

Keywords: diverse carriers, gender, nationality, generation

Enjoy Hybrid Life!
