1. Japan Agency for Marine-Earth Science and Technology

International Ocean Discovery Program (IODP) is an international marine research collaboration joined by 26 nations. Implement organizations of IODP conduct Education and Outreach activities for various stakeholders such as scientists, media, general public, younger generation, educator, etc. IODP education and outreach activities makes these targets to understand IODP and scientific results. Also, IODP scientific result should be updated for various target as common knowledge of our society. I would like to introduce our activity for each example and discuss about need for science and education fields.
